

# Package ‘jiebaRD’

October 13, 2022

**Type** Package

**Title** Chinese Text Segmentation Data for jiebaR Package

**Description** jiebaR is a package for Chinese text segmentation, keyword extraction and speech tagging. This package provides the data files required by jiebaR.

**Version** 0.1

**Date** 2015-01-03

**Author** Qin Wenfeng

**Maintainer** Qin Wenfeng <mail@qinwenfeng.com>

**License** MIT + file LICENSE

**Suggests** jiebaR

**URL** <https://github.com/qinwf/jiebaRD/>

**BugReports** <https://github.com/qinwf/jiebaRD/issues>

**NeedsCompilation** no

**Repository** CRAN

**Date/Publication** 2015-01-04 07:11:14

## Description

jiebaR is a package for Chinese text segmentation, keyword extraction and speech tagging. This package provides the data files required by jiebaR. jiebaR supports four types of segmentation mode: Maximum Probability, Hidden Markov Model, Query Segment and Mix Segment.

**Details**

You can use custom dictionary to be included in the jiebaR default dictionary. jiebaR can also identify new words, but adding your own new words will ensure a higher accuracy.
